

Confined Space (Level II) Entry

WorkplaceNL Approved

Course Duration: 2 Day

Who should attend?

This training program is intended for supervisors and employees who will be entering a confined space to complete work. Day 1 of the training includes all of the training material covered in the one-day Confined Space Awareness course, combined with Day 2 which involves hands-on practical exercises in the classroom and on our industrial Confined Space Simulator.

REL 's training program and instructors are WorkplaceNL Approved and Certified.

Curriculum Topics include:

- Hazard Assessment / Job Task Analysis
- Inspect and verify implementation of Energy Isolations
- Complete a CSE Permit to be used for entry into the CS Simulator
- Assignment of Roles (safety watch)
- Hands-on practical use of the Fall Arrest Harness
- Setting up of the Tripod on the CS Simulator
- Hands-on use of the Gas Detector (bump test gas detector and gas testing of the CS Simulator)
- Hands-on use of SCBA (pre-use inspection / donning for entry into the CS Simulator)
- Hands-on use of the Emergency Response Equipment (Tripod)
- Completion of Practical CS Entry using Fall Arrest Harness and Tripod, SCBA, and Gas Detector

Note: Participants must bring personal protective equipment.
