

Aerial Lift / Scissor Lift Safety Training

Course Duration: 1 Day

Who should attend?

This training program has been designed to address the safety concerns related to operating a self-propelled Lifting device. The purpose of this program is to make operators aware of their responsibilities and to provide instruction that will facilitate the safe operation of an Aerial Lift / Scissor Lift

Curriculum Topics include:

- Legislative Requirements and Other Standards
- Self Propelled Aerial Lift / Scissor Lift
- Hazards Associated with the Aerial Lift / Scissor Lift
- Safety Precautions
- Inspection of Equipment
- Aerial Lift / Scissor Lift Operation and Safety Awareness
- Emergency Procedures
- General Safety
- Classroom theory and practical exercise using Aerial Lift / Scissor Lift.

Note: Participants must bring personal protective equipment.
