

# Competent Fall Protection Inspector

**Course Duration:** 1 Day

**Who should attend?**

This training program has been designed give participants an increased level of knowledge into inspection of fall protection equipment. According to the Canadian Standards Association, two separate inspections are required for your fall protection equipment: (1) a user inspection completed immediately prior to use, and (2) a qualified inspector inspection completed at least annually. This course was developed in accordance with CSA Standards and various manufacturers' guidelines.

**Curriculum Topics include:**

- Legislative and CSA Requirements
- Inspection Scheduling and Documentation
- Equipment Material Characteristics
- Equipment Characteristics
- Equipment Lifespan
- Material Deficiencies
- Equipment Deficiencies
- Cleaning and Storage

**Note:** Participants required to bring Personal Protective Equipment
