

WHMIS 2015

Course Duration: ½ Day

Who should attend?

This course is designed to reduce accidents and injuries from working with or in close proximity to hazardous chemicals (controlled products). It teaches participants how to recognize a hazardous material and identify the risks. It also prepares participants for the safe use, handling, storage and disposal of hazardous chemicals identified as controlled products under WHMIS 2015.

Curriculum Topics include:

- Legislative Requirements
- Chemical Hazards
- Controlled Products
- WHMIS 2015 Classifications / Symbols
- Labels
- Safety Data Sheet (SDS)
- Workplace Responsibilities
